San Francisco / Bay Area

### SKILLS

**Languages:** JavaScript, Python, SQL, HTML, CSS

**Frameworks/Tools:** React.js, Express.js, Redux, Flask, SQLAlchemy, Sequelize, AWS

### PROJECTS

**Pinstory** | ( JavaScript, React/Redux, Python, Flask, AWS, SQLAlchemy, CSS3, PostgreSQL )

[Live Site](#) | [Github](#)

*Pinstory is a web application that lets users create, browse, and save pins to boards, inspired by Pinterest.*

- Designed and implemented a polished and modern user interface design through the implementation of well-defined wireframes and detailed documentation, resulting in a streamlined development process and delivering an aesthetically pleasing experience for users.
- Employed AWS services, such as S3, to enable seamless image uploading for users, resulting in improved application functionality.
- Leveraged third-party packages, including react-dropzone and masonry layout, to enhance the overall user experience.

**Pear Music** | ( JavaScript, React/Redux, Python, Flask, AWS, SQLAlchemy, CSS3, PostgreSQL )

[Live Site](#) | [Github](#)

*Pear Music is a full-stack web app inspired by Apple Music, offering easy browsing and streaming of a vast music selection.*

- Collaborated with a team of developers to implement a full-stack web application utilizing agile methodologies in order to develop a wide range of features to offer users easy browsing and streaming of a vast music selection.
- Leveraged third-party packages such as react-player and AWS, allowing users to upload and stream music seamlessly.
- Developed the application's front-end using React/Redux, which provides dynamic and user-friendly interfaces, while Flask and SQLAlchemy handled server-side operations and managed the PostgreSQL database on the back-end.

**MyBnb** | ( JavaScript, React/Redux, CSS3, Express.js, Sequelize, PostgreSQL )

[Live Site](#) | [Github](#)

*MyBnb is a full-stack web application that draws inspiration from the highly popular Airbnb platform, empowering users to effortlessly browse and explore a wide variety of housing options.*

- Employed industry-standard technologies such as Express.js and Sequelize on the back-end to handle server-side operations and manage the PostgreSQL database.
- Led the full-stack development and design of MyBnb, applying industry-standard technologies and methodologies to deliver a high-performance and user-friendly web application.
- Implemented React/Redux on the front-end to create dynamic and interactive user interfaces, providing users with an optimal browsing and booking experience on MyBnb.

### EXPERIENCE

#### IT Technician

*Elevate Technologies, Mar 2022 - Dec 2022*

- Installing, configuring, and maintaining hardware and software systems.
- Troubleshooting and resolving hardware and software issues.
- Documenting and updating procedures and guidelines for system users.

#### Sales Associate

*Nordstrom, Sep 2017 - Dec 2021*

- Arranged new merchandise with signage and appealing displays to encourage customer sales and move overstock items.
- Built and maintained relationships with peers and upper management to drive team success.
- Maintained knowledge of current promotions, exchange guidelines, payment policies and security practices.

### EDUCATION

**App Academy** - Immersive software development course with focus on full stack web development (Fall 2022)

**Skyline College** - Studied Psychology (August 2018 - 2020)
